

SMART APPROVER APP

A Smartsoft Innovation

The Smart Approver App, developed using SAP Business Technology Platform (BTP), is a sophisticated solution designed to optimize approval processes through its robust integration with SAP S/4HANA (On-Premises, Public/Private Cloud).

Dual-Role Functionality

Users can easily view and edit data from custom tables in SAP S/4HANA through a user-friendly interface, while approvers can efficiently review and approve changes, ensuring automatic updates within the system

Multi-Level Approval Configuration

The approval workflow is scalable to accommodate teams of any size, with flexible configurations that allow for multiple requestors and approvers to align with your organization's hierarchy.

Automated Email Notifications

Approvers receive instant alerts for required actions, while requestors benefit from real-time email updates on the status of their submissions, ensuring effective communication throughout the process.

Enhanced Productivity

The Smart Approver App streamlines workflows by automating approvals and minimizing manual tasks, enabling direct interaction with SAP S/4HANA to reduce repetitive data entry and errors.
