

SMART APPROVER APP

**Accelerate Decisions,
Simplify Approvals
with SAP BTP**

About Us

Founded in 1997 in Atlanta, GA, Smartsoft has consistently grown by offering diverse services to SAP clients across industries. Over two decades, we've expanded our capabilities and earned numerous accolades, including Gold Partnership with SAP.

Product Overview

The Smart Approver App, developed using SAP Business Technology Platform (BTP), is a sophisticated solution designed to optimize approval processes through its robust integration with SAP S/4HANA (On-Premises, Public/Private Cloud).

Benefits

Increased Efficiency

Automate approvals and reduce time on administrative tasks.

Improved Accountability

Ensure transparency and traceability with timely, targeted approvals.

Cost Savings

Reduce manual intervention and errors, achieving substantial cost savings

Scalable Solution

Scales with Your Needs, Offering Flexibility and Customization

Transform your approval process with the Smart Approver App—where efficiency meets simplicity.

Features

Dual-Role Functionality

Consumer: View and edit data from custom tables within the SAP S/4HANA system. Submit changes with a simple, user-friendly interface.

Approver: Review and approve the data edits made by requestors. Approved changes are automatically updated in your SAP S/4HANA system.

Automated Email Notifications

Approver Alerts: Automatically notify approvers when their action is required, ensuring no request goes unnoticed.

Status Updates: Keep requestors informed with real-time status updates via email, so they always know the current state of their submission.

Multi-Level Approval Configuration

Flexible Setup: Configure multiple requestors and multiple levels of approvers to match your organization's approval hierarchy

Scalable: Adapt the approval workflow to fit small teams or large enterprises, ensuring that every necessary stakeholder is involved.

Enhanced Productivity & Time-Saving

Streamlined Workflow: The Smart Approver App automates approvals, cutting manual work and speeding up the process.

Integrated Data Management: Interact directly with SAP S/4HANA within the app, cutting out repetitive data entry and minimizing errors.

Use Case

Imagine a scenario where a department needs to update a critical piece of data in custom table within the SAP S/4HANA system. Instead of navigating through complex workflows or waiting for approvals via email chains, the requestor simply logs into the Smart Approver App, edits the necessary information, and submits it for approval. The designated approver receives an instant notification, reviews the changes, and with a single click, approves or rejects the request. The updated data is reflected in the SAP S/4HANA system, all within minutes.
